To Whom It May Concern

In-Situ Construction were the head Sub-contractor for **VDM** of Perth, WA for the construction of the Rumah Baru Passenger Facility in Cocos (Keeling) Islands and I was the VDM Project Manager. In-Situ Construction contracted works consisted of filling and placement 2.5m³ geotextile sand containers and tubes from Geofabrics (specially manufactured for coral environment), steel tube and sheet piling, construction of the 230m link bridge, fill to the offshore island and construction of associated carpark and building platforms.

The construction commenced in March 2009 and was completed after 18 months on time. During the construction, the project maintained a zero LTI status for 150,000 m/hrs.

Please feel free to email or call me direct should you require any additional information on the performance of In-Situ Construction of Dongara.

Yours faithfully

Nicholas A Strange *FIEAust*
